# Mississippi Department of Employment Security

## I. Comprehensive Mission Statement for the Agency

The Mississippi Department of Employment Security (MDES), the state's workforce agency, has a straightforward mission - *Helping Mississippians Get Jobs*. We complete our mission of connecting workers with jobs by providing job placement and training to workers and personnel services to businesses. MDES collects employer taxes that provide workforce training funding to the Community College Board through the Workforce Enhancement Training (WET) Fund and administrative funding to the State Workforce Investment Board, which coordinates workforce development in Mississippi. We manage the state's unemployment insurance trust fund and pay unemployment insurance benefits, an income stream that helps keep Mississippi families and communities afloat in tough economic times. And, MDES disburses National Emergency Grants, Disaster Unemployment Assistance and Trade Adjustment Assistance funds.

## II. Statement of Agency Philosophy, Values, and Principles

MDES is committed to managing workforce and unemployment programs by delivering great customer service to individuals and employers. Our philosophy is to treat everyone with respect and to conduct business using the highest professional standards possible.

## III. Relevant Statewide Goals and Benchmarks

Statewide Goal # 1: To develop a robust state economy that provides the opportunity for productive employment for all Mississippians.

Relevant Benchmarks #1:

- Percentage of the civilian non-institutional population 16 years and over employed
- Percentage of Mississippians receiving workforce training services who are employed one year and five years after receiving training and their median salary
- Unemployment rate (unemployed persons actively looking for a job as a percentage of the size of the labor force; the sum of employed and unemployed persons)
- State business tax climate (comparison of more than 100 variables across five major areas of taxation: business taxes, individual income taxes, sales taxes, unemployment insurance rates and property taxes)
- Annual percentage change in non-farm jobs
- Net job growth
- Wage and salary disbursements

Statewide Goal #2: To make available an accessible, quality public higher education at an affordable cost that prepares Mississippians to become productive, financially self-sufficient members of society while meeting the human resources needs of Mississippi

and its employers, including the creation of new jobs through the commercialization of university-based research.

Relevant Benchmarks #2:

- Percentage of students trained through workforce education and training programs customized to meet the needs of local industries who successfully complete the program
- Wage gains of AA (university parallel) degree, AAS (technical) degree, and certificate or credential

#### **IV. Overview of the Agency 5-Year Strategic Plan**

MDES' primary goal is to help all Mississippians who want a job to get a job, or to get a better job. MDES will continue to partner with the state's employers to obtain their job listings. Our staff will work to identify and refer the most qualified candidate for each job opening in our system. If no one is available, we will act as a conduit between business and training providers to identify candidates with training potential for those jobs. In addition to the launch of an award-winning job-matching mobile app, MDES launched an app making it easier for individuals to file their weekly unemployment insurance claims.

The agency will continue to assist employers as the state mandated provider of e-Verify service, ensuring that everyone referred to open positions posted in our system is eligible to work in the U.S.

MDES plans to partner with more of the state's colleges and universities to expand utilization of the msgradjobs.com website. Graduating students can register on this site to find jobs listed in the state, which match their field of study and skills. Changes are underway to make the MSGRADJOBS.com database of qualified workers searchable by employers.

Over the next five years MDES will continue to be good stewards of the unemployment insurance (UI) trust fund, keeping it one of the most solvent UI trust funds in the nation. We will do this by collecting UI taxes in a timely fashion, by ensuring the people who are eligible for those benefits receive them, and by enacting processes to identify and stop potential fraud.

Mississippi is in the fifth year of a six-year project as the lead in a three-state consortium that has brought in \$71,500,000 into the state to develop a cloud hosted, multi-tenant technology system for UI and related programs. The Congress granted an additional year to liquidate the special funds extending the project's original five year timeline to six years. Two other states, Rhode Island and Maine, were granted \$14,350,760 and \$12,500,000 respectively as part of the consortium project. Currently, the Agency is expanding the partnership to work with the state of Connecticut in preparation to join the UI technology system under development. Mississippi received an additional funding of

\$1,589,154 to assist Connecticut in the preparatory work while Connecticut received \$3,255,940 for their state specific expenditure.

The agency will continue to collect and distribute Labor Market Information used to illustrate the employment and unemployment picture in the state. These statistics also identify employment sectors poised for growth; and they are used to help economic development professionals market our workforce to potential businesses moving to the state or expanding in the state.

MDES is working to identify ways to streamline internal processes and procedures that will create a more efficient and cost-effective workflow. These efficiencies support our workforce planning as we anticipate further reductions in staff due to retirements and decreased federal funding.

## **V. Internal /External Assessment Section**

### **Employment Services**

The majority of Employment Services (ES) programs are federally funded under the Workforce Innovation and Opportunity Act (WIOA) and the Wagner-Peyser Act, through the U.S. Department of Labor (USDOL), which defines performance measures. The WIOA and Wagner-Peyser performance measures are negotiated prior to each program year. The WIOA increased the number of performance measures defined and tracked by USDOL and changed the criteria for some existing measures. USDOL identified new performance measures changes last year, after the MDES 2018-2022 strategic plan was delivered. Timing of systems modifications to capture the data in the new formats required by USDOL could impact performance numbers and result in reduced funding. The Wagner-Peyser performance measures, negotiated each program year, were also changed slightly.

### **Unemployment Insurance**

MDES is required to meet federal guidelines for administering the UI tax programs. The performance measures for the UI programs, defined by USDOL, relate to timeliness of claims, timeliness and quality of appeals, timeliness of employer tax registrations and detection of overpayments. Unforeseen events, such as disasters, cause an influx of claims for which the agency may not be staffed. Any large influx of claims may impact timeliness, quality, and overpayments.

### **Labor Market Information**

All programs operated by the Labor Market Information Department are federally funded. Our ability to collect data and publish information is completely dependent on getting those funds. Much of the data published comes from voluntary surveys of employers either through mail or by telephone collection. These surveys would be impacted by any large-scale disasters or reduction in available funding.

The agency has management policies in place to track performance as it relates to the U.S. Department of Labor standards for each program. Tracking procedures include monthly and quarterly updates for each program standard outlined by USDOL.

MDES' state-of-the-art technology systems include reporting that provides performance measurements to the USDOL. In addition to numbers provided by technology systems, USDOL requires periodic on-site monitoring of program elements.

MDES executive and management staff continually search for ways to streamline processes to improve efficiency, maximize funding, and increase customer access to our services. The agency seeks supplemental funding to fund projects that support these efforts.

Because the agency is 100 percent federally funded, reductions in federal appropriations or the inability to access funds would significantly impact the organization's operations.

## **VI. Agency Goals, Objectives, Strategies and Measures by Program**

**Fiscal Year 2019**

### ***Employment Services***
