**Agency Description and Programs**

House Bill 659 of the 1989 Regular Legislative Session changed the name of the Department of Natural Resources to the Department of Environmental Quality. The Department has a central administrative unit and three operating offices: Geology, Pollution Control, and Land and Water Resources. The Bureau of Pollution Control also administers the State Revolving Loan Fund.

**1. Pollution Control**

This program safeguards the health, safety, and welfare of present and future generations of Mississippians by conserving and improving the state's environment and fostering wise economic growth through responsible regulation. The department issues environmental permits, monitors ambient air and water, and does compliance evaluations.

## 2. Construction Grants

This program provides state matching funds to help municipalities and political subdivisions secure federal funds to design and build improved wastewater treatment facilities, non-point source pollution control projects, and stormwater pollution control projects.

## 3. Land and Water

This program regulates water uses through a permit system, conducts hydrologic investigations of aquifers, regulates the construction and operation of dams, and regulates water well drillers. The Land and Water Office is required to develop and maintain a water management database and develop a State Water Resources Management Plan so that water resources are utilized to the fullest extent possible.

## 4. Geology

This program conducts studies of the mineral resources of the state including oil, natural gas, stone, clay, coal, and all other mineral substances of value and administers the leasing of oil, gas, and mineral rights on state properties. Reports and maps are provided to educational institutions, the state library, and others. This program is also responsible for managing the development of a digital land base computer model of the state.

## 5. Administrative Services

This program is responsible for the consolidation of the administrative functions under a single office in order to avoid costly duplication of personnel, equipment, and related expenses that would occur if each office within the Department carried out the functions. The centralization of these functions helps to provide coherent, equitable and consistent application of resources and policies within the department. These functions include accounting, payroll, purchasing, data processing, personnel, motor pool and vehicles, maintenance, printing and records, and public relations.
