Agency Description and Programs

Section 57-21-1, Mississippi Code of 1972, established the Mississippi State Chemical Laboratory (MSCL). The Laboratory, in equal partnership with the Department of Agriculture and Commerce, assures the quality and safety of fertilizers, animal feeds and pesticides bought by Mississippi farmers. It jointly approves registration and labeling of all feeds and fertilizers with the Department of Agriculture and Commerce and performs all chemical analysis of pesticides sold in Mississippi for information and regulatory action. It analyzes all limestone from the state lime plants, checks private water supplies, analyzes state minerals and ores, provides industrial chemical consulting, and performs human and animal toxicology analysis, cooperating with hospitals, doctors, veterinarians, and police agencies. It is the primary agency responsible for the safety, wholesomeness, and quality of our state food supply, with the exception of meat and milk. It checks foods, soils, and waters for dangerous pesticide and drug residues. It conducts research on basic scientific problems of chemical or microbiological nature, which are of importance to the state and its people. It analyzes state petroleum products and antifreezes for the Mississippi Department of Revenue in its Petroleum Products Division.

1. Regulatory and Other Technical Services

This program provides analytical testing support, chemical and physical test data, and advisory services to state agencies, city, county, and other state governmental units, and to industries, universities, and private citizens. It provides similar support for product-quality regulation as authorized by state law (i.e., agrochemicals, petroleum and related products, foods, etc.).

2. Sponsored Research

This program provides technical management and scientific direction and assistance to individual lab scientists and technical managers in the Chemical Laboratory's major activities in conducting basic and applied scientific research.
