Agency Description and Programs

In April 1963, the Tombigbee River Valley Water Management District was organized, under the provisions of Chapter 224, Laws of 1962, and has twelve-member counties. This is a long-range program, backed by studies made by organizations such as the U.S. Army Corps of Engineers, Natural Resources Conservation Service, State Game and Fish Commission, and Park Commission. The District was authorized to coordinate the efforts of all federal, state, and local agencies involved in the development of the District. The scope of work of the District involves the implementation of conservation and development projects, such as flood prevention, flood control, preservation of fish and wildlife, recreation, and the Tennessee-Tombigbee Waterway. Operating expenses for this program are derived from the 1/2-mill local ad valorem tax levied in the member counties and from the 2-mill state ad valorem tax retained by member counties. Supplementary project funds are derived from the sale of bonds and federal funds.

1. Flood Control Projects

This program serves as a local sponsor to the U.S. Army Corps of Engineers. It is responsible for the local share of the construction of flood control projects and for the maintenance of after project completions.

2. Tombigbee Waterway Projects

This program works with local, state, and federal agencies to provide and maintain terminals along the waterway. The agency is also the local sponsor for recreational projects and provides local non-federal funds for facilities.

3. Water Related Resources

This program's major focus is the development of a regional water resources plan to ensure adequate, quality water supplies for the future including a public awareness program of the need for groundwater conservation. Additionally, funds are provided to local counties for water related recreational and industrial sites.

4. Resource Conservation and Development

This program serves as project sponsor for Northeast Mississippi with the Natural Resources Conservation Service for forestry, wildlife, and recreational projects.
