## NARRATIVE OF SPECIAL FUNDS DETAIL AND TREASURY FUND/BANK ACCOUNTS

MS State Board of Registered Professional Geologists

Name of Agency

# **OTHER SPECIAL FUNDS**

Fund Number 3858 is the Registered Professional Geologists Fund within the State's Treasury, into which all monies from its Licensure & Regulation Program are deposited, less the Trustmark National Bank account which averages a \$1,000.00 balance (see Trustmark National Bank account). All of the funds which are placed in Treasury Fund 3858 are from application, examination, and renewal fees and other monies related to operations of the Board of Registered Professional Geologists under the guidelines of its enabling legislation (Registered Professional Geologists Practice Act of 1997) as revised during the 2006 Legislative Session (effective July 1, 2006), and its Rules and Regulations. Since the re-enactment of the revised law there was a revision of the Board's fee schedule and the adoption of registration renewals that are now set to coincide with the begining of each calendar year.

## TREASURY FUND/BANK

The Trustmark National Bank checking account, that is listed as the "Mississippi State Board of Registered Professional Geologists," is used as a clearing account. It maintains an average account balance of \$1,000.00 and is used to transfer monies it receives through its program of Licensure & Regulation into its State Treasury Fund Number 3858.

## **PROGRAM NARRATIVE**

Program Data Collected in Accordance with the Mississippi Performance Budget and Strategic Planning Act of 1994 (To Accompany Form MBR-1-03)

#### MS State Board of Registered Professional Geologists

AGENCY NAME

1 - LICENSURE & REGULATION

PROGRAM NAME

#### I. Program Description:

The program of Licensure & Regulation consists of the following areas:

1) Administration of Competency Examination(s) - Examination of applicants to maintain and ensure standards of geologic knowledge, competency, and expertise related to the public practice of geology;

2) Participation with the National Association of State Boards of Geology (ASBOG) - this portion of the program of Licensure & Regulation consists of the Board participating on a semi-annual meeting basis by sending one or more Subject Matter Experts who serve on the Board or its designee(s) to review, update, and maintain the two geologic competency examinations (the Fundamentals of Geology and the Practice of Geology examinations). This participation is furthered by the Board being represented at the ASBOG Annual meeting by a Board designated voting delegate and also by continuous participation by the Board's Executive Director who chairs two of ASBOG's various committee;

3) Applicant Credential Review/Verification -Thorough review of applicant's credentials prior to their acceptance as Registered Professional Geologist (RPG) or Geologist-In-Training (GIT) to ensure that the applicant meets or exceeds the requirements as set forth under the Registered Professional Geologists Practice Act of 1997 to publicly practice of geology;

4) Investigate/Discipline - this aspect of the program is involved with the compliance of registrants/licensees and enrollees to the Registered Professional Geologists Practice Act of 1997 (one of the major portions of the regulation component), including those that may attempt to publicly practice geology in the state that may not be appropriately registered and/or qualified to do so. The Board accomplishes this portion of its program through either formal complaints filed with its office or through actions which it may initiate on its own behalf. In either case, the Board in so doing may impose disciplinary action(s) that may consist of sanctioning and/or implementation of remedial training, fine(s) and/or the revocation of a registrant's license to publicly practice geology. If the complaint and ensuing Board action is against a non-registrant of the agency, the Board may be required to institute relief via civil ligation (e.g. court imposed injunctive relief);

5) Information Dissemination - Provide for the dissemination of relevant information to existing and potential applicants, examinees, registrants, enrollees, state and federal agencies, and the public to assure their understanding of current procedures, laws, rules & regulations governing the public practice of geology; and

6) Continuing Education - Provide access/notification of educational programs/professional meetings, and offerings of affordable, continuing education seminars, short courses, training, etc. to assure the continued professional competency and professional enhancement of its registrants/licensees and enrollees practicing or training under the supervision of a registered/licensed professional geologist in the state of Mississippi.

### II. Program Objective:

The objectives of the Licensure & Regulation Program is to safeguard the public's life, health, and property and to promote the public welfare by thoroughly reviewing qualifications of applicants; to administer qualifying/competency examinations; to investigate complaints and, where warranted, effect subsequent disciplinary actions; provide educational outreach; and enforce the Registered Professional Geologists Practice Act of 1997, via the act itself along with its rules & regulations governing and related to the public practice of geology.

Program Objective 1 - Administration of Competency Examinations: This program objective focuses on the qualifications and registration/enrollment of applicants. These activities are continuously ongoing. In FY99 the agency administered its first Association of State Boards of Geology (ASBOG) examinations (national qualifying/competency exams) to applicants and also to the geology students of the Univ. of Mississippi, Mississippi State Univ., the Univ. of Southern Mississippi, and Millsaps College. These institutions of higher learning in the State of Mississippi all offer degrees in geology. All of the noted institutions have implemented the requirement that the ASBOG "Fundamentals of Geology" examination must be taken by all senior-level geology majors and also for those graduating with advanced degrees in geology. The only exception is that Millsaps College strongly recommends the exam for those students majoring in geology with an emphasis on environmental geology. Nationally, Mississippi pioneered the use of this exam for the purposes of assessment of both geology students and geology teaching staff. Since the "Fundamentals of Geology" examination was first adopted and implemented as an "exit" exam by this agency in Mississippi (the first in the nation), other states with licensure/registration have either implemented or are anticipating its use as an "exit" exam.

In addition to implementing the "Fundamentals of Geology" examination as an "exit" exam, this exam is also administered to those who desire to become licensed in Mississippi to publicly practice geology. This exam is the first of two competency examinations that must be successfully passed prior to becoming a registrant. Once the Fundamentals of Geology examination is successfully passed the examinee may either become a Geologist-In-Training (if s/he lacks the four years of geologic work experience) or request to sit for the second examination (the "Practice of Geology") if s/he has the required four years of work experience to be considered for registration as a Registered

PROGRAM NAME

AGENCY NAME

Professional Geologist. Once an applicant for registration has successfully passed both examinations and the Board has received all other required information and fees the applicant is then reviewed by the Board for his/her acceptance to publicly practice geology in this state. The ASBOG examinations have been administered by this Board since FY99 and thereafter on a continuous basis, once every six (6) months. Note: the ASBOG examinations have been adopted for use by every U.S. state (now numbering 30) and one (1) U.S. territory (Puerto Rico) that have geology practice regulation acts.

Program Objective 2 - Applicant Credential Review/Verification -Thorough review of applicant's credentials prior to his/her acceptance as Registered Professional Geologist (RPG) or Geologist-In-Training (GIT) to ensure that the applicant meets or exceeds the requirements as set forth under the Registered Professional Geologists Practice Act of 1997 to publicly practice of geology. The continued implementation of this facet of the Program of Licensure & Regulation requires verification of a minimum of the following: 1) degree(s) in geology with course work consisting of 30 semester or 45 quarter hours in geology; 2) 3 references submitted by geologists familiar with the applicant that verify the applicant's professional work history; 3) a written record of the applicant's work history including work activities; 4) verification of licensure/registration with other state boards (other than Mississippi) where the applicant may be licensed/registered to publicly practice geology including a brief background check utilizing those records); and 5) the determination and/or receipt of the grades obtained from any compentency examinations that the applicant may have taken related to the professional practice of geology.

Program Objective 3 - A critical portion of the program's objectives is related to the regulation of the activities of those performing geologic tasks that may impact the public's health, safety, and welfare. These regulatory activities began increasing in FY 2000 and have continued to maintain a consistent level going into FY 2011 - this pattern has been projected into FY 2012. In order to further this key component of the program, the Board has attempted to increase the awareness of the geologic and related, regulated community as well as the un-regulated community of its presence and objectives through education and communication of the Board's activities through newsletters, its web site (www.msbrgg.state.ms.us), formal public presentations, etc.

As a natural consequence of the legislated requirement of registration for those who publicly practice geology there has been a corresponding increased awareness of the practice act and an increased number of verbal reports and/or complaints which have been filed with the Board related to unregistered/unqualified geologic practice. In addition to formal complaints which have been filed with the Board there has been a consistent flow of verbal complaints concerning questionable geologic activities that may result in further and future actions of the Board on its' own behalf if such activities are found to be under the jurisdiction of the Board's regulatory functions.

Program Objective 4 - Information Dissemination - An additional objective of the program is to identify those components, practices and professional work (private and public/governmental) that are geologic in nature and then to communicate those practices and activities identified as geological to others. The identification of these geologic activities that may impact the public's health safety and welfare have been tabulated. In most cases those activities should be performed only by those who are so qualified (i.e. registered professional geologists). The listing of geologic activities that has been tabulated by the the Association of State Boards of Geology and is followed by this board of registration. This information is being disseminated by the board through continued, numerous meetings with other state agencies, related professional organizations, private industry and also through a proactive stance with the institutions of higher learning in the state that have programs in the geological sciences. Educational outreach activities has led to an increased awareness that geologic work, when performed in or affecting the public sector, must be done by or under the supervision of a registered professional geologist.

The director of the agency has a series of presentations that are (and have been) delivered to those groups that are interested in knowing more about the practice of geology. Additionally, the director visits the University of Mississippi, Mississippi State University, the University of Southern Mississippi, and Millsaps College and provides students of geology an overview of geologic licensure/registration and the competency examination process.

Program Objective 5 - Another key component and object of the Board's program of Licensure & Regulation has been the implementation of low cost (or no cost) continuing voluntary education opportunities and the dissemination of information related to other educational opportunities that may be available through companion professional organizations to help ensure that its (the Mississippi State Board of Registered Professional Geologists) registrants maintain and expand their professional competency in existing and new technologies and technological advances in the geological sciences, as well as existing, modified and new governmental rules, regulations, and procedures that may have components which are related to geologic practice and the protection of the public's health, safety and welfare. A portion of these program objectives are funded from regulatory and other fees as set forth in its enabling legislation. This agency had partnered with the Eastern Gulf Region of the Petroleum Technology Transfer

# **PROGRAM NARRATIVE**

### MS State Board of Registered Professional Geologists

## 1 - LICENSURE & REGULATION

PROGRAM NAME

AGENCY NAME

Council over several years and the two had been offering from 1 to 4 seminars each year on topics related to the public practice of geology. However in 2008 the Department of Energy discontinued the funding of the Petroleum Technology Transfer Council. The program was taken over by the American Association of Petroleum Geologists with no provision for funding to make such offerings less expensive so that they would be more affordable for the vast majority of this agency's registrants. This shift in focus was unfortunate and the MSBRPG has refocussed its efforts to offer and/or to support one or more continuing education program each calendar year. The MSBRPG has and continues to communicate educational opportunities to its' registrants that are offered in the Mississippi area - consistent with program guidelines.

- III. Current program activities as supported by the funding in Columns 6-15 (FY 11 Estimated & FY 12 Increase/Decrease for continuations) of MBR-1-03 and designated Budget Unit Decisions columns of MBR-1-03-A:
- (D) Continuation of Program:

Increases are the result of the following: 1) Increase in Contractual as the potential for litigation increases based on the level and costs incurred in FY 2008, FY 2009, 2010, and 2011; and increase in continued and increased reliance on third party, independent contractors instead of hiring a full-time employee; 2) Increase anticipated during the FY related to increased costs of commodities (paper, office products, etc.); and 3) Decrease in equipment cost based on the potential procurement of a computer workstation should the need arise for the majority of the agency's IT and computing/wordprocessing/data base applications.

Planning Act of 1994

MS State Bo	bard of Registered Professional Geologists	1 - I	LICENSURE & REC	
AGENCY NA			PROG	RAM NAME
	RPG) on a per application basis			
4	Disciplinary Actions - there were two (2) letters of admonishment issued and two (2) investigations that were the result of 4 valid complaints filed with the Board. One complaint, not included in the previously noted 4, was received and was not investigated as it lacked the complainants name and contact information. Two (2) of the investigations resulted in the issuing two notices of hearings with the two defendants. In the interim the two defendants proactively came into compliance with the Board's Rules and the RPG Act of 1997 and no disciplinary actions/fines were instituted as a result.	5,250.00	12,000.00	12,000.00
	The Board anticipates the same number of admonishments and likely formal hearings in both FY 2010 and FY 2011.			
	As noted in previous budget requests, as a matter of basis, it is estimated that on an enforcement basis, actual costs to the Board have been on the order of \$2,000-\$4,000/case. With that said it is anticipated that there is the potential for three (3) enforcement cases of this magnitude have been included in the overall budget of this agency for FY 2012 to ensure enough reserves to carry out the regulation activities of this agency.			
5	Continuing Education - due to the dissolution of the U.S. Department of Energy's program administered under the Eastern Gulf Region's Petroleum Technology Transfer Council, this agency has been making available to its registrants and enrollees announcements of low cost educational alternatives. The Board will continue in its efforts to find low cost educational opportunities for its registrants and enrollees and has discussed the potential for co-sponsor a day long seminar related to an environmental geology issue/issues with other interested geological organizations. As such, the agency did not expend any monies in this category in FY 2010 but may expend monies during 2011 and 2012.	0.00	750.00	750.00

**PROGRAM OUTCOMES:** (This is the measure of the quality or effectiveness of the services provided by this program. This measure provides an assessment of the actual impact or public benefit of your agency's actions. This is the results produced, i.e., increased customer satisfaction by x% within a 12-month period, reduce the number of traffic fatalities due to drunk drivers within a 12-month period.)

		FY 2010 ACTUAL	FY 2011 ESTIMATED	FY 2012 PROJECTED

## NARRATIVE 2012 BUDGET REQUEST

#### MS State Board of Registered Professional Geologists

Name of Agency

The following recaps each of the major expenditure categories utilized by this agency including the reasons for a requested increase, decrease, or level funding for each.

Personal Services (Salaries, Wages & Fringe Benefits) and Travel - Recommended No Increase in Request from Requested FY 2011 to Requested FY 2012

In past narratives the Board of Registered Professional Geologists has cautiously maintained that it does not have the funds needed to establish and implement the service of another full-time employee, i.e. an Administrative Assistant. As further noted, the Board has chosen instead to utilize the services of independent contractor(s) thus making it more financially efficient. If conditions warrant the Board will request the implementation of another full-time position, i.e. an administrative assistant or similar position, in the future.

Although there is no increase in the personal services category placed in the FY 2012 Budget Request over what was requested in the FY 2011 Budget Request the amount that is requested still allows for the reasonable latitude in the remuneration of its one (1) full-time employee should the Board determine that additional remuneration is warranted. This would be tempered and only implemented provided that it was mutually acceptable under the current guidelines conditions as set forth by the Mississippi State Legislature and the State Personnel Board.

Last under this category is travel. There is no requested increase from what was requested in the FY 2011 Budget Request compared to the FY 2012 request. Travel costs have been kept to a minimum to the extent practicable while still maintaining the Board's legislatively mandated obligations related to its program of Licensure & Regulation and attendance at semi-annual geology examination review workshops.

#### Contractual - Recommended Increase from FY 2011 to FY 2012

As in past budget requests, there are contractual funds reserved for potential costs associated with the Board entering into litigation related to the enforcement of its regulation of the public practice of geology. Estimates of litigation fees reflected in the legal costs incurred and associated with formal complaints have now been established. However, previous cases did not require the Board to file legal suits within the judicial system as they were resolved under the powers legislatively granted to the Board. During FY 2012 the Board anticipates similar costs as encountered in the historic past and has the continued need to reserve monies in this category, specifically those monies needed for contractual legal and court costs over and above current funding levels should it (the Board) be required to enter into legal actions beyond those associated with legal actions that can only be accomplished via civil proceedings.

Further, this Board is mindful of costs and as a rule it negotiates for the lowest possible contractual fees. With that said and as example of this, in 2009 the Board's Executive Director renegotiated its office lease that resulted in an overall cost savings of \$2,460.00. However, with that said, it is important to bring to your attention that the building in which the Board is currently housed (the Jackson Enterprise Center) is now being managed by a new group of management personnel and it is yet unclear as to the future of the building and surrounding area, i.e. it is a concern of the Board and its Executive Director as to safety of the aforementioned, visitors, and its current office. In conclusion, and with a review of current office space costs in the Jackson metro area, we have included a significant increase in the rent category request for FY 2012 should conditions make it necessary to physically move the Board's office to another, safer location.

We have again maintained the spending authority request reserved for the Department of Audit fees category (61620) from FY 2011 to FY 2012. The agency still anticipates a financial audit and as such it will continue to provide a funding request in this area of its budget forecasts in order to funds available to defray the expenses related to same.

Lastly, we continue to rely on Independent Contractor(s) in lieu of hiring a full time employee as to maximize the agency's monies expended. As a result, we anticipate an incremental increase in that category but far less than the costs associated with the hiring of a full time employee during the FY 2012 time frame.

#### Commodities - Recommended Increase from FY 2011 to FY 2012

The increase (\$1,100 or 22% in the expenditures related to Commodities only) is the result of anticipated increased costs related to paper, paper products, as well as other common office supplies. The agency makes its

## NARRATIVE 2012 BUDGET REQUEST

#### MS State Board of Registered Professional Geologists

Name of Agency

newsletter available on its web site and, as a result, costs associated with printing, mailing, postage, etc. have been minimized to the most reasonable extent possible. That being said, the agency has significantly reduced printing and postage costs associated with one of its publications/mailings.

Captial Outly, Equipment expenses - Recommended Decrease from FY 2011 to FY 2012

The agency has set aside monies for the purchase of a new computer workstation, if it is required. This contingency plan is in effect should there be an unfortunate system failure. Also note here that the agency backs up all of its data files a continuous basis so no data is irretrievably lost due to a system failure.

The agency does not anticipate another computer purchase until 2012 or later but must maintain that the inevitability that the agency's main computer could malfunction to the degree that it must be replaced does indeed exist. The decision to purchase a new workstation is totally dependent on the operational condition of the existing system. It is anticipated that the agency will likely defer the purchase of a new computer until FY 2012 or later but it needs to maintain its expenditure authority in this area as part of the agency's contingency plan. If a new system is required in FY 2012, it is anticipated to cost approximately \$2,000.00.

Summary of anticipated major expenditure areas as related to the continuation of the current program of Licensure and Regulation that have projected increases/decreases are as follows:

Categories with Recommended Requested Increases for FY 2012 from those Requested for FY 2011:

1) Personal Services (Salaries, Wages & Fringe Benefits) - no increase in salary of the agency's one employee but latitude is maintained and subject to the authorities and conditions pursuant to the State Personnel Board and the Legislature;

2) Contractual - Recommended increase that is based on past investigations and legal actions and use of Independent Contractor(s). Previous legal/investigative costs have served as a gauge as to the amount of monies required to successfully investigate and defend the agency's enabling legislation, rules, and enforcement powers granted thereto. As noted, the potential for additional, future legal actions and services that will be required during FY 2011 and into 2012 may increase. This increase has been reflected in the 2012 budget request in this category.

Lastly, the recommended increase also allows for the continued utilization of Independent Contractor(s) (from general clerical/administrative assistance to complaint investigations) for an overall total dollar amount much less than what would be required via the hiring of another agency employee;

3) Commodities - Recommended increase is the result of anticipated increased costs for paper, paper products, and other office product cost increases. It is anticipated that during FY 2012, as in past FY narratives, printing of items like the agency's newsletter will continue to be minimized and instead of being printed in-house, it will be distributed electronically thus reducing paper, postage, and labor expenses. However, because there is the continuing requirement in the RPG law that registrants vote on potential Board members along with the continued provision to provide that list with each potential Board member's ranking to the Governor for his/her ultimate selection, there will continue to be costs associated with mailings related to the distribution of paper ballots per that requirement.

4) Equipment - recommended \$500.00 decrease is requested as previously discussed. The agency will continue to defer the purchase of a new workstation computer unless conditions dictate otherwise. However, if the existing equipment fails during the course of FY 2011, it will be required to purchase same during that FY or later during FY 2012.

# OUT-OF-STATE TRAVEL FISCAL YEAR 2010
