

OFFICE OF THE ATTORNEY GENERAL
5-YEAR STRATEGIC PLAN
FOR THE FISCAL YEARS 2026 - 2030

OFFICE OF THE ATTORNEY GENERAL

1. Comprehensive Mission Statement:

Serving as guardians of the rule of law in Mississippi.

2. Statement of Agency Philosophy

For all Mississippians, setting the bar in the pursuit of justice, forging partnerships to solve the State's most pressing challenges, and serving with excellence in investigation, enforcement, education, and advocacy.

3. Relevant Statewide Goals and Benchmarks

Public Safety and Order

Statewide Goal #1: To protect the public's safety and assist in the operation of a fair and effective system of justice.

Relevant Benchmarks #1:

- Percentage of convictions after indictment
- Minimum affirmations of criminal convictions
- Caseload per attorney
- Caseload per investigator
- Number of days to close a case not resulting in charges

Government and Citizens

Statewide Goal #2: To create an efficient government and an informed and engaged citizenry that helps to address State challenges.

Relevant Benchmarks #2:

- Cost of support services as percentage of budget
- Response time to consumer complaints
- Processing time for Crime Victim Compensation requests
- Average Crime Victims Compensation award
- Average Sexual Assault Exam payment amount
- Cost savings to state agencies for legal services provided
- Number of citizens trained on cyber crimes, domestic violence, vulnerable person abuse, consumer fraud, election fraud, etc.

4. Overview of the Agency 5-Year Strategic Plan:

The Office of the Attorney General (AGO) is continually challenged to provide and maintain the current high quality and level of legal services in traditional areas such as representation of state officials and state agencies, criminal prosecution and appellate work, and consumer protection while concurrently adapting to newly identified areas of concern including but not limited to human trafficking, the protection of children, the elderly, and other especially vulnerable populations, and the investigation and prosecution of cyber and cyber-related crimes.

Activity of the AGO is primarily response-oriented in that cases are managed that have their origins in circumstances outside the influence or input of the agency. Thus, being able to accurately predict the caseload in any year is difficult, if not impossible. With that uncertainty comes an accompanying difficulty in determining the staffing requirements to efficiently and effectively perform the duties necessary for the best possible service to Mississippians. Like any large law firm, the ability to hire and retain talented, dedicated, and knowledgeable employees is directly proportional to the success of representation of clients. In the case of the AGO, those clients are ultimately the citizens of Mississippi.

Over the past decade, the AGO has experienced a steady increase in its caseload and in the complexity of lawsuits against state agencies and public officials, especially in employment grievance appeals and lawsuits, appeals of state agency regulatory decisions, and civil rights cases involving law enforcement personnel. Large companies, including pharmaceutical manufacturers and social media platforms, and their trade groups, are increasingly suing the State over laws passed by the Legislature, requiring time- and labor-intensive litigation against some of the nation's largest and best-financed law firms. Continued criminal activities of various types in the State of Mississippi result in a heavy caseload for both attorneys and investigators in divisions with jurisdiction in these areas. The caseload of the attorneys dealing with criminal appeals and habeas corpus litigation continues to be heavy and growing, as well. Additionally, the escalating problems of widespread human and drug trafficking and increased gang violence require additional manpower and specialized training and equipment to secure sufficient evidence for indictments and convictions.

Thus, over the next five (5) years, this agency foresees a need for additional workforce to handle the increased caseload and uncertainty of potential caseload as well as to provide support in Litigation and Opinions, Enforcement, and Other Mandated Programs. Also, the AGO's ability to hire and retain experienced staff in competition with both the private sector and other governmental agencies demonstrates a need for additional funding for salary increases. As funding becomes available, additional and vacant positions will be filled. Divisions funded through federal and other source funds will be kept properly staffed through mid-year escalation and the normal budget request process.

5(A). External/Internal Assessment

1. Additional responsibilities mandated by State or Federal Legislative action
2. Passage of federal legislation to authorize Medicaid Fraud Control Units to investigate all federally funded mandated health care programs
3. Decrease in federal funding for Medicaid Fraud Control Unit
4. Increase in the number of state agencies, boards, or commissions represented by this agency
5. Significant increase in civil suits filed against the State of Mississippi.
6. Specific rulings from the Courts which adversely impact a specific "type" of case handled within the agency
7. Significant increase in number of Mississippi prosecutors or others served through Prosecutor and Law Enforcement Training Division
8. Reduced availability of General Funds appropriation for statutorily mandated programs formerly funded through fee assessments including Prosecutor Training, Cyber Crime, Vulnerable Persons, Child Desertion, Domestic Violence, Law Enforcement Officers and Firefighters Disability, Children's Advocacy Centers, Motorcycle Officer Training, and Crime Victim Compensation
9. Significant increases in medical costs and claims received for crime victims
10. Increase in illegal robocalls and fraudulent activity along with the passage of federal legislation, authorizing further enforcement and traceback ability and new responsibilities as sole enforcer for state telemarketing laws
11. New consumer protection concerns in cyber and social media
12. High turnover rate resulting in a failure to retain attorneys, investigators, and other professionals due to continuing to lag behind market salary levels
13. A dramatic reduction in federal funds available for crime victim advocacy, domestic violence, and similar assistance to those impacted by the criminal acts of others

5(B). Internal Management System Used to Evaluate Agency's Performance

1. Processes are being automated to accurately track program measures and outputs, including the implementation of a new case management system.
2. Yearly budgets are distributed by program/sub-program.
3. Semi-annual meetings are held to assess whether each program area is on target with set program objectives, outcomes, and efficiencies. Action is taken to remedy any problems and flexibility is given in the implementation of the process to make any necessary adjustments.
4. Organizational chains of command are observed to ensure that division head is aware of all activity within each specific unit in order to monitor efficiency and effectiveness.

5. Performance Measures are reviewed by division heads and modified as needed.
 6. Annual meetings are held with division heads to ensure that management and employees understand what the desired results and/or outcomes are in order to be successful.
 7. Short-term performances have been developed which more effectively focus on the agency's long-term objectives.
 8. Internal audit procedures are being developed for performance measures for all programs.
 9. Annual meeting of all staff to go over leadership, professionalism, and agency goals.
6. **Agency Goals, Objectives, Strategies and Measures by Program for FY 2026 through FY 2030:**

The following goals, objectives, strategies and measures by program apply to fiscal years 2026, 2027, 2028, 2029 and 2030. As programs and state and/or federal laws change, adjustments will be made.
